

**Your final line of defense
against contaminants**

- Excellent filtering capabilities
- Removes contaminants such as water, oil, and dirt that form in the airline between the wall-mounted filtration

Rubber from deteriorating air hose
Rust scale from inside old pipes

**See for yourself why
Whirlwind is better than
competitive filters.**

**WHIRLWIND™
DISPOSABLE FILTER**

**REDUCE PAINT
DEFECTS CAUSED
BY DIRTY AIR**

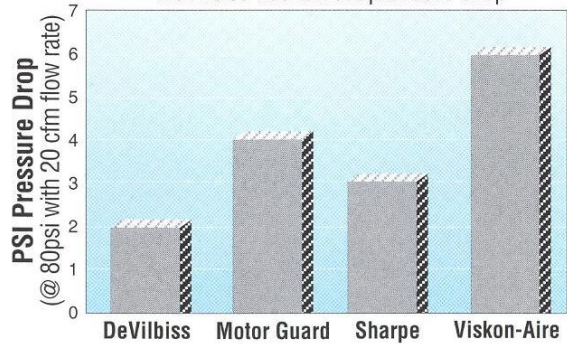

FILTER ELEMENT INLET SURFACE AREA

Larger area = longer life & less pressure drop
DeVilbiss has largest surface area

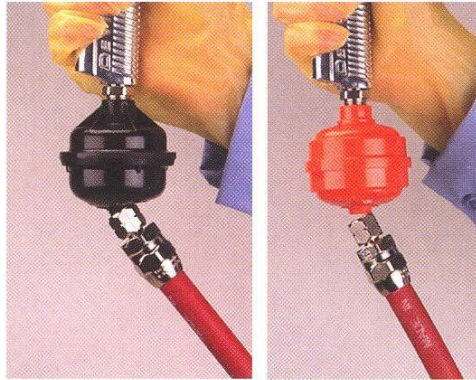

FILTER PRESSURE DROP

Lower drop = better flow
DeVilbiss has lowest pressure drop

- Lowest pressure drop among competitive filters
- Can be used with all HVLP spray guns

- Strongest thread and housing design on the market
- Housing material is tough, solvent-resistant DuPont DELRIN®

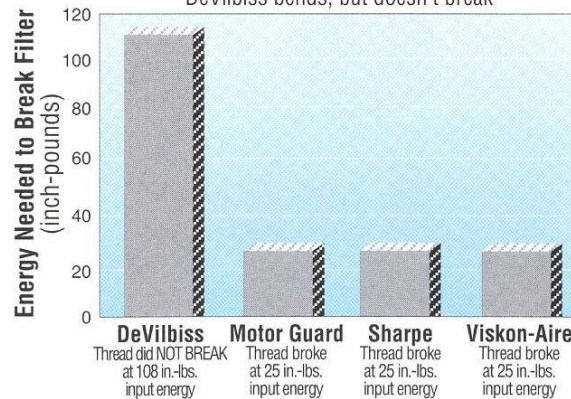

Dramatization

Whirlwind™ filter - bends rather than breaks

Competitor's filter - breaks rather than bends

FILTER TOUGHNESS

Energy needed to break male thread. More energy = stronger.
DeVilbiss bends, but doesn't break

DeVilbiss Whirlwind: longer life and less pressure drop

- Patented two-stage filter
 - Stage 1- Swirl Chamber- Removes large water droplets before they reach the filter media
 - Stage 2- Filter Media- Removes smaller water droplets, oil droplets, and dirt particles

All other competitive filters:

- Water droplets saturate the filter media - shortening the life of the filter
- Smaller inlet surface area increases pressure drop
